Duration	3 hours

Context

The gaming competition will make every player compete in the very classic game Warcraft II from Blizzard. The games will be played on the first version of the game.

The tournament format will be a first round of 3 games in a "Round Robin" format in pools of 4 teams. Each game will be a duel, two players from one team against two players from another team.

Afterward, the best team from each pool will be able to send their best player in the tournament grand finale that will put the best 7 players in a free-for-all game.

How to start a game

For each game, a player will be designated to host the game, and the other players will join it.

Hosting players

To host a game, you have to execute the command `./host.sh GAME_ID` where `GAME_ID` is the identifier designated in the schedule. This command will start Warcraft II. Once in the game, the player will need to go to the `Multi Player Game` menu and enter his team name.

Once in the multiplayer menu, the player will need to select the `IPX network` option and click on `Connect`. On the next screen click on `Create Game`.

Once on the `Multi Player Setup`:
- Click on `Select Scenario` and choose the `Nowhere to run, Nowhere to hide` map.
- Select `Disallowed` on the Cheat Codes option.
- Wait until every players are ready and click `Start Game`.

Joining players

Simply execute the command `./join.sh GAME_ID` where `GAME_ID` is the identifier designated in the schedule. This command will launch Warcraft II. Once in the game, the player will need to go to `Multi Player Game` and enter his team name.

Once on the multiplayer menu, the player will need to select the `IPX network` option and click `Connect`. On the next screen, wait until a game shows up in the list, click it, and press `Join Game`.

Once on the `Multi Player Setup` screen, click on the checkbox on the left of your team name to signal that you are ready.

In the game

Once in the game, click on the `ALLIES` button at the top right of the screen and check the name of your colleague and check `Allied Victory`.

Good Luck & Have Fun!

Strategies

- Your first building to build should be the `Great Hall` (Orc) or the `Town Hall` (Human). Choose your worker and click on the hammer icon to access the building meu. Build this building as close as you can to the mine.
- The goal of Warcraft II is to destroy your enemies with your army. The key to success is to accumulate a large amount of resources allowing you to build a bigger army. Focus your early game on creating workers from your Hall and building farms. It is normal to have around twenty workers before having an army.
- Right click on the mine to collect gold after selecting a worker. Right clicking on trees will collect wood.
- Farms are required to build a bigger army.
- The `Barracks` allow you to create soldiers
- The `Lumber Mill` will allow you to build archers and to collect wood faster.
- The `Forge` allows you to make your army stronger with upgrades.
- The `Barracks` allow you to transform your Hall in a Stronghold and unlock new buildings and units.
- You can build more than one `Barracks` to produce units faster.

Scoring

- 10% for simply being here - yes, you are awesome.
- 20% per game won in the first 3 rounds
- 0 to 30% for the final round rankings
